

PM1532T: Table with Rain Flowers Mesh

The PM1532T with specially made "rain flowers mesh" is the perfect table to be used for indoor or outdoor dining, while its steel construction supports heavy-duty use in either setting.

The powder coating provides protection from UV rays in outdoor applications, and the plastic floor slides prevent marking and scratching on surfaces below.

This table's floral top provides the dining area with eye-catching detail, and the black finish matches a variety of furniture pieces.

An umbrella hole is integrated into the top for shade on sunny days.
